Hi Justina

I am reaching out to you with reference to your enrollment status within the ALX software engineering program.

You did it! You made it through the cut-off exercise and our community is relishing in excitement.

Your final score for the month is **over 80%** and you have been advanced to continue in this program.

What next? We recommend you take a moment to celebrate this milestone, as this is no small task that you have just accomplished. Once you are done with the celebration, it is back to work—because learning continues and we want to see you surpass these scores.

We encourage you to maintain this learning pace as it is super important in the upcoming month of learning.

Please remember that you are scheduled to attend a live learning session scheduled for tomorrow, to launch this new advancement phase— Kindly confirm the time as shared by your mentor on your slack channel.

Happy Learning,

Faith,

For the ALX SE Team.
